Mysterious Japanese Landscape AMANO HASHIDATE

Amanohashidate, located in Miyazu Bay on the Sea of Japan in northern Kyoto Prefecture, is one of Japan's Three Most Scenic Spots, along with Matsushima in Miyagi Prefecture and Miyajima in Hiroshima Prefecture. The terrain formed over thousands of years is extremely rare, and when viewed from the surrounding high ground, it looks like a land bridge stretching into the sky, which is why it was given its name. It is a tourist destination that can be enjoyed in a variety of ways. This could include the view from the observation deck, strolling through the pine forest, or enjoying the view from a boat.

What is "Matanozoki"?

This is a traditional posture for viewing Amanohashidate. Stand at the observatory with your back to Amanohashidate and bend forward to look through the legs. The sea and sky are reversed, creating a mystical scene in which Amanohashidate looks like a bridge spanning the sky.
